Arman Meshram

Nagpur, Maharashtra | +91-8208727037 | Email | LinkedIn | GitHub | Portfolio | Twitter

SUMMARY:

Passionate and skilled SOFTWARE ENGINEER with a strong foundation in building dynamic, user-centric APPLICATIONS.

TECHNICAL SKILLS:

- **FRONTEND: HTML, CSS, JAVASCRIPT, REACT.JS**
- **BACKEND: C/C++, Python, NODE.JS, EXPRESS.JS**
- **DEVOPS: AWS, Google Cloud, Azure**
- **DATABASE: PostgreSQL, MYSQL, NOSQL**

WORK EXPERIENCE:

AI/ML Intern – Maincrafts Technology
Duration: 20 May 2026 – 20 June 2026
Domain: Artificial Intelligence & Machine Learning

- **Completed a project-based internship focused on the supervised machine learning lifecycle, including data preprocessing, exploratory data analysis (EDA), model training, and evaluation.**
- **Developed a baseline regression pipeline using Linear Regression to predict housing prices and evaluated performance using MAE, RMSE, and R^2 metrics.**
- **Applied feature scaling using StandardScaler and compared Linear Regression, Ridge Regression, and Decision Tree Regressor models.**
- **Investigated model overfitting and implemented 5-fold cross-validation to assess model generalization and reliability.**
- **Analyzed model performance and compared evaluation metrics to understand model behavior and identify suitable regression approaches.**

Technologies: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Jupyter Notebook, Machine Learning, Regression Analysis, Cross-Validation.

PROJECTS:

Blockchain-Based E-Commerce Platform | Full-Stack Web Development
Technologies: Python, Django, SQL, MetaMask, Blockchain, JSON, HTML, CSS, JavaScript

- **Developing a blockchain-integrated e-commerce platform that combines traditional web technologies with decentralized payment capabilities.**
- **Implementing backend functionality using Django and Python to manage application logic, product information, and user interactions.**
- **Integrating MetaMask to enable cryptocurrency wallet connectivity and facilitate blockchain-based transaction workflows.**
- **Working with SQL databases for structured data storage and management, with JSON for data exchange between application components.**
- **Building the platform architecture to support secure, transparent, and efficient digital commerce experiences.**

NetScope – Network Traffic Analyzer
Technologies: Python, Scapy, FastAPI, React.js, SQLite, REST APIs, JSON

- **Developing a network traffic analysis application to capture, inspect, and classify network packets across common protocols such as TCP, UDP, DNS, and ICMP.**
- **Building an interactive dashboard to visualize packet statistics, protocol distribution, traffic rates, and source/destination metadata.**
- **Implementing REST APIs and database storage to manage packet metadata, capture sessions, and network traffic summaries.**
- **Developing rule-based anomaly detection to identify unusual traffic patterns and generate potential security alerts.**
- **Integrating PCAP file analysis and CSV/JSON export capabilities for offline traffic investigation and reporting.**

EDUCATION:

SYMBIOSIS INSTITUTE OF TECHNOLOGY - NAGPUR | BACHELOR OF TECHNOLOGY | JULY 2028
